

## (Senior) Statistician (f/m/d)

[Apply now](#)[< Back](#)

JOB ID - 5427

### The spot

Are you a statistician with a lot of experience? Would you like to contribute your knowledge both at the Vienna location and in the BioPharma statistics network and further develop and actively shape this well-established area?

We are a stable, international and family-run pharmaceutical company and are looking for exactly you!

### Tasks & responsibilities

- Internal and external support for statistical issues at the Vienna location and in the global BioPharma network in close cooperation with the various departments
- Part of the global statistics group, which is responsible for the entire BioPharma network (locations in Austria, Germany, China, USA)
- Independent support and further development of core topics within the network as well as creation of training documents and training of employees
- Preparation and review of relevant documents, submission documents, study protocols and reports
- Support with all statistical issues, including development/validation/transfer of products/methods/processes or data-driven troubleshooting evaluations
- Participation in global process initiatives or global expert groups

### Requirements

- Completed scientific training (studies in mathematics or statistics or related courses with many years of experience and profound expertise)

-depth knowledge of one or more statistical methodologies used in the field of  
MC statistics (comparability studies, design of experiments, Bayesian statistics,

- generalized linear models, multivariate data analysis, etc.) desirable
- Good knowledge of the statistical software R
- Good knowledge of the regulatory requirements for statistical issues; Several years of experience in the GMP environment of a pharmaceutical company is an advantage
- Enjoy working in a global environment within a cross-border team
- Very good knowledge of English and German as well as very good presentation skills and the strength to be able to communicate complex issues to non-experts

## Your benefits

- Flexible working time models/home office depending on area and position
- Integrated window days for more free time
- Company restaurant with a varied lunch menu for your daily well-being
- Position-specific training and further education so that we can grow together in the long term
- Comprehensive health promotion to support your health in the best possible way

The minimum basic salary according to the classification according to the collective agreement for this position is € 43,548.40 gross per year (full-time). The actual salary is based on industry-standard salaries, your individual qualifications and experience.

## We are looking forward for your online application!

Please upload your application documents directly via our application portal so that we can treat your data in a GDPR-compliant and confidential manner.

Do you have any additional questions? Your HR Recruiting Manager for this position is Kristijan Zivkovic.
