

# Statistical support to the statistics and programming department in a rapidly growing niche CRO

”

"Very friendly company,  
great to work for with  
genuinely supportive  
management team. Small  
company - so opportunities  
to get involved with  
company projects"

Glassdoor  
Current employee - March 2019

Twickenham, London, UK. We have two other UK offices the BioHub in Greater Manchester and Swansea in Wales, as well as an office in Boston, Massachusetts, US. We have a great work ethic and culture focussing on delivering high quality statistics and programming for the reporting of Phase I-IV clinical trials across a variety of therapeutic areas to clients worldwide.

We work on exciting and challenging international projects for our clients that give us the opportunity to deliver exceptional value and high quality results. This enables us to enhance our own capabilities and grow as a team within a great working environment.

## Veramed Excellence Programme – Framework for continuous professional development

Veramed is committed to helping develop statistics and programming graduates. We not only help to enhance your technical abilities but also look to bring out the attributes required for a successful career in the pharmaceutical industry based on our Veramed Excellence Programme. We encourage everyone to demonstrate these values in everything that we do and look to foster a great culture and positive work environment.

### Purpose of this role:

The role of the Senior Statistician is to provide statistical support to the statistics and programming department in relation to a specific Functional Service Provider agreement.

There is a genuine focus on "Quality First" to drive efficiency, which is very refreshing having seen this slip in my previous company. Fantastically friendly culture within the company where everyone seems happy to help each other out no matter how big or small the request is.

Glassdoor, Sept 2018

Very friendly company, great to work for with genuinely supportive management team. Small company - so opportunities to get involved with company projects across all levels and have an impact on strategy. Good career pathways available with options for either technical excellence or people management options.
