Dear Hiring Manager,

Ref: Non-Clinical Statistician

I am writing to express my interest in the non-clinical statistician position available on your website. I have an MSc. in Biostatistics (UHasselt) and a PhD in Statistics (KU Leuven). I have worked as a non-clinical statistician in the pharmaceutical industry and also have transferable experience from medical research and academic areas whose skills will be useful for this role. I am interested in joining your esteemed team so I can play a part in supporting clients' projects and ultimately improve people's health.

I have a strong understanding of statistics from my training as well as my past experience. I am also immediately available, flexible and eager to learn and apply newer statistical methodologies as this specific position may require. I have transferable skills like providing statistical support to non-statisticians, knowledge of multiple models applicable in non-clinical statistics, working in a highly regulated environment, design of experiments, preparing SAPs, setting up, monitoring and analyzing projects that will be handy for this role. I am proficient in R, SAS and JMP statistical softwares. I would be delighted to expand my skills at Aixial Group to play a part in improving people's health across the globe.

Accompanying this letter is my CV which enumerates skills that are relevant for the role. I would be delighted to be considered for an interview to learn more about this position and share my motivation for working with your team.

Sincerely,

**Maaya, Leonard**
