Veramed, United Kingdom

Dear Hiring Manager,

Ref: Statistician position at Veramed

I am writing to express my interest in the Statistician position available on your website. I have an MSc. in Biostatistics (UHasselt) and a PhD in Statistics (KU Leuven). I have worked as a statistician in a medical research organization and at Janssen pharmaceuticals where I have accumulated over five years of applied statistical experience. I am interested in joining your team because my training as a statistician and interest in statistical programming makes for a good match.

In my experience and studies as a statistician, I have gained expertise that closely aligns with the profile outlined for this role. I have been involved in clinical and pharmaceutical research. I am experienced in a range of statistical and programming analyses and proficient in R, R-Shiny, SAS, STAN and OpenBUGS. I have also supported the design of experiments, simulations for sample size calculation and collaborated internally and with external partners on scientific projects. Joining your team at Veramed would be a fantastic opportunity for me to not only apply these (among other analysis tools) methods but also work with your great and world renown teams to help improve healthcare for everyone.

Accompanying this letter is my CV which enumerates my strength as a statistician as well as other skills that are relevant for the role. I would be delighted to be considered for an interview to learn more about this position and share my motivation for working with your team.

Sincerely,

Maaya, Leonard
