Medpace
Heverlee, Leuven, Belgium

Dear Hiring Manager,

Ref: Statistical analyst

I am writing to express my interest in the Statistical analyst position available on your website. I have an MSc. in Biostatistics (UHasselt) and have worked as a statistician in a medical research organization and at Janssen pharmaceuticals where I have accumulated over five years of applied statistical experience. I am interested in joining your team because I am passionate about clinical trials for which Medpace is a global leader.

In my experience and studies as a statistician, I have gained expertise that closely aligns with the profile outlined for this role. I have been involved in clinical and pharmaceutical research. I have worked on cohort studies in medical research, I understand statistical methods applicable in clinical trials and I am proficient in SAS. While this will be the first time working on clinical trials in a pharmaceutical setting, I have no doubt that the combination of my experience in the industry and strength as a statistician will enable me to adapt fast to the responsibilities I will be required to do.

Accompanying this letter is my CV which enumerates my strength as a statistician as well as other skills that are relevant for the role. I would be delighted to be considered for an interview to learn more about this position and share my motivation for working with your team.

Sincerely,

Maaya, Leonard
