

# Statistician

## Job description

Do you want to develop data-based solutions, spread the use of statistical methods and work with optimisation and improvement projects within Emerging Technologies in Novo Nordisk?

If so, we offer an exciting and challenging position as Statistician.

### The position

As a Statistician for all Emerging Technologies you will support the production of oral products, manufacturing processes and analytical methods together with two competent statistician colleagues. You will be working in close cooperation with colleagues from other areas of expertise, focusing on understanding their problems, sparring during development of statistical solutions, and communicating the solutions.

You can look forward to a broad variety of tasks. In particular, you deliver and present statistical solutions in a clear language and ensure that they are used as intended. You develop and teach courses and workshops in statistical topics.

Furthermore, you will drive or participate in data science-based optimisation and improvement projects to enhance the use of statistical methods. The statistical tools vary and can often be within linear mixed models, design of experiments, general explorative statistics, multivariate statistics, acceptance sampling and statistical process control.

### Qualifications

- A strong background in mathematical statistics as Master's in Science in Statistics, Mathematics or Engineering. Newly graduated are also encouraged to apply.
- Preferably experience within applied statistics in the pharmaceutical industry.
- The composure to keep focus in complicated matters and handle many different tasks at the same time.
- The ability to work independently with impact and high engagement.
- Comfortable documenting your work in written reports
- Excellent communication and interpersonal skills with the ability to collaborate with stakeholders at all levels.
- You have experience with statistical software such as R, SAS and possibly SAS JMP.
- Data manipulation and programming skills are considered a plus.
- Lastly, you speak and write English.

The team works in a highly collaborative way, supporting each other to get tasks completed and meet goals. It is highly appreciated to share creative thoughts and to discuss the statistical methods to seek the optimal solution in every task. We value the ability to work with people of different background and focus on standardising and optimising work processes. You have ample opportunity to develop your professional and personal skills as well as influencing your job.

### About the Department

Emerging Technologies (ET) is a newly established SVP area in Novo Nordisk. We have a growing pipeline of new products, many of which are based on emerging technology platforms coming into Product Supply via internal development projects and externally acquired assets. ET is well-known for having a pioneering spirit as well as a curious and daring approach and we play a key role in developing and producing future treatments for millions of patients around the world.

Our department, Manufacturing Development Support employs approximately 30 highly skilled and motivated employees with the missions to maintain products on the market. Our growing portfolio currently holds solid-dose products within Hormone Replacement Therapy (HRT), diabetes and obesity.

### Working at Novo Nordisk

At Novo Nordisk, we don't wait for change. We drive it. We're a dynamic company in an even more dynamic industry, and we know that what got us to where we are today is not necessarily what will make us successful in the future. We embrace the spirit of experimentation, striving for excellence without fixating on perfection. We never shy away from opportunities to develop, we seize them. From research and development, through to manufacturing, marketing, and sales – we're all working to move the needle on patient care.

### Contact

For further information, please contact Associate Manager, Sara Cockerton, (+45) 3079 6514.

### Deadline

24th of September.

Please note that we will be reviewing applications on an ongoing basis, and we encourage you to apply as soon as possible.

You do not need to attach a cover letter to your application, but please include a few sentences about why you are applying in your resume or CV. To ensure an efficient and fair recruitment process, please refrain from adding a photo in your CV.

We commit to an inclusive recruitment process and equality of opportunity for all our job applicants.

At Novo Nordisk we recognize that it is no longer good enough to aspire to be the best company in the world. We need to aspire to be the best company for the world and we know that this is only possible with talented employees with diverse perspectives, backgrounds and cultures. We are therefore committed to creating an inclusive culture that celebrates the diversity of our employees, the patients we serve and communities we operate in. Together, we're life changing.
