Qiagen, Manchester, United Kingdom

Dear Hiring Manager,

Ref: Statistical programmer

I am writing to express my interest in the Statistical programmer position available on your website. I have an MSc. in Biostatistics (UHasselt) and a PhD in Statistics (KU Leuven). I have worked as a statistician in medical research and in the pharmaceutical industry where I have accumulated over five years of applied statistical programming experience. I am interested in joining your team because it will give me a chance to help improve healthcare around the world - an ambition that resonates perfectly with Qiagen's role in the industry.

In my experience as a statistician, I have gained expertise that closely aligns with the profile outlined for this role. I have been involved in statistical programming in medical and pharmaceutical research using multiple softwares (SAS, R, STATA). I am experienced in the application of statistical methods to real world problems and enjoy collaborating with colleagues in data management, analyses and reporting when working on projects. I am also a willing learner and a team player. Joining your team at Qiagen would be a fantastic opportunity for me to not only apply the skills I already have but also to learn new skills to help improve healthcare for everyone.

Accompanying this letter is my CV which enumerates my strength as a statistician as well as other skills that are relevant for the role. I would be delighted to be considered for an interview to learn more about this position and share my motivation for working with your team.

Sincerely,

Maaya, Leonard
