## Senior Statistician I

You applied for this job on September 1, 2023.

[View Application](#) Spain - Barcelona Full time Posted 27 Days Ago R-159853

### Job Description / Capsule

The Senior Statistician I has necessary academic qualifications, and sufficient experience working as a statistician in the pharmaceutical industry, to work independently on standard activities. More complex studies, and analytical work, will be guided by a more experienced statistician. Common activities include study-level support, including set-up, conduct, analysis and reporting. Technical statistical projects can also be addressed.

### Typical Accountabilities

- Demonstrate independence in providing statistical support for standard design and interpretation of study data
- Under guidance of a more experienced statistician will undertake design and analysis of complex studies, and provide statistical support for broader programmes, which may include preclinical studies, complex regulatory submissions or commercialisation activities and/or high level internal governance committee interactions
- Under guidance of a more experienced statistician, analyse internal and external information to inform design decisions and the development of decision criteria
- Apply modelling and simulation to inform study design, assess robustness of results etc
- Develop a Statistical Analysis Plan for study and/or project delivery
- Produce analysis, supporting graphics and analysis tables for standard studies, such as in preclinical or clinical study reports, Global Medical Affairs studies or publications
- Able to interpret, summarise and communicate results of standard studies
- Contribute to the improvement of methodology and provide practical solutions for problems
